

Compact Method 5

The Apex Instruments **Compact Method 5 Sampling Kit (SK-CM5)** features an independently heated Stainless Steel Filter Assembly (SFA-82H) that connects directly to a standard Method 5 probe. This system does not require a separate heated filter compartment and utilizes a flexible sample line and a cutback umbilical cord with power adapter to allow sampling in space-limited areas. The standard glass impingers have been replaced with stainless steel impingers (S-5CN) to eliminate glass breakage. Three filter assemblies are recommended to speed turn-around time between consecutive runs. The Compact Method 5 sampling kit is used in conjunction with any of the Apex Instruments MC-500 series source sampler consoles. Alternate sampling kits available upon request.

SK-CM5 Includes:

Qty	Part #	Description
3	SFA-82H	Compact M5 82mm SS Heated Filter Assembly
1	GF-82GC	82mm Glass Fiber Filters, 100/box (MFS GC50-82mm)
1	PS-6H	6 foot Method 5 Probe Sheath with Tube Heater , 120V
1	PLS-6S	6 foot Probe Liner, Both Ends Plain, 1 Nut & Ferrule
1	USL-15-QST	15 foot Unheated Sample Line, PTFE with SS Overbraid
1	UC-60-15	60 foot Cut-Back UC, 15ft Sample Line, Etc.
1	UA-3J	Power Box Adapter
1	GA-100	Sample Case Adapter
1	GA-109-12	Impinger Inlet Strain Relief
1	SB-3	Impinger Box / Insulated Coolant Reservoir
1	NS-SET	Set of 7 SS Nozzles
1	S-5CN	Stainless Steel Impinger Assembly
